Some documentaries have measurable impact

Continued from 10

Education and experts who study education say that many children who are currently being educated in the United States are not learning as well as they could be. They believe that some children are not learning as much as they could, and that some children are learning as much as they could, but not as much as they could.

The challenge for researchers is to find ways to improve the educational system for all children, so that they can learn as much as they could. The researchers believe that the educational system is not doing a good job of teaching all children. They believe that the educational system is not doing a good job of teaching all children, and that the educational system is not doing a good job of teaching all children. They believe that the educational system is not doing a good job of teaching all children, and that the educational system is not doing a good job of teaching all children.
